To whom it may concern,

I would like to commend East Coast Marine Construction & Design, Inc. for an outstanding job on the Oak Hill V.I.A. Hall Improvement project.

East Coast Marine Construction has proven to be an excellent Design/build General Contractor.

On this project we worked closely with Michael Fletcher who led the project efficiently and without issues. Correspondence was responded to promptly, changes were priced competitively and executed quickly.

From design and execution, to manpower and material, the schedule was managed effectively throughout the project. As a result, the project was delivered on time and within budget.

East Coast Marine Construction and its team used an effective teamwork mentality and proactively sought out effective solutions to any jobsite issues. All the tradesmen worked safely and efficiently and produced quality work.

In closing I am confident that given the opportunity, East Coast Marine Construction & Design, Inc. would be an invaluable resource to any project.

Respectfully,

A handwritten signature in black ink, appearing to read "Erin B. Anderson".
